COMET SYSTEM's Compliance with the RoHS Directive

COMET SYSTEM is committed to compliance with the European Union Restriction of Hazardous Substances (RoHS) Directive that will restrict the use of lead (Pb), mercury, cadmium, hexavalent chromium and two bromine-containing flame retardants: PBB (polybrominated biphenyls) and PBDE (polybrominated diphenyl ethers) in electrical and electronic products. COMET SYSTEM's goal is to exceed compliance obligations by meeting the requirements of the RoHS Directive. By July 1, 2006, RoHS substances will be eliminated (to levels below legal limits) for all COMET SYSTEM products subject to the RoHS Directive.

All products and product accessories manufactured for and delivered comply the above directive since the beginning of 2006.

COMET SYSTEM's initiative to comply the RoHS Directive is part of the company's Environment policy which includes finding alternatives for hazardous materials, designing energetically efficient products and products that can be recycled.

COMET SYSTEM, s.r.o.
On the 22nd of May, 2006

A handwritten signature in black ink that reads 'Josef Belica'.

Josef Belica,
company director
