Comet Database for Web Sensors
Quick Start

This short manual will guide you through the preparation of system *Comet Database* with Web Sensors. It references to chapters in main manual (*CometDatabase_Manual_en.pdf*).

If you have already followed steps in e.g. Quick Start manual *Comet database for Dataloggers*, then don't do steps 1 to 4 – you have already created the database.

Follow steps one by one:

1) Install Microsoft SQL server.
   Described in chapter 1.2 Installation of Microsoft SQL Server

2) Install the program *Database Manager* (is part of product *Comet Database*) on the same computer where you have installed database server.
   Download here: http://www.cometsystem.cz/products/reg-cdb#download
   Described in chapter 2.1. Installation of program Database Manager.

3) Create database of the system on database server.
   Described in chapter 2.2 Using Database Manager for creation database on database server

4) Create two user accounts in the database. One with *read* and one with *read/write* access.
   Described in chapter 2.3.2.b User administration.

5) Prepare SOAP Server.
   Described in chapter 6.1 Preparing SOAP Server (data entry from sensors)

6) Connect at least one sensor to the system.
   Described in chapter 6.2 Sensor settings

7) Install the program *Database Viewer*. Run it and connect to the database. Go to *Online data* tab and you should see data from connected sensor there.
   Described in whole chapter 3 Using program Database Viewer
